

Finding the Name of the Sword in *Tasmanian Quest*

Tasmanian Quest has a puzzle to solve. The prize is a hand made sword of steel and bronze in a “dragon skin” (leather) scabbard. Both sides of the pommel are engraved with images from Tasmanian Quest. On one side the wish-giving flounder and on the other, a sprig of Kings Holly, the oldest plant in the world, found only in a remote region of Tasmania. The starting point for your quest is in the answers to the riddles. You will find the riddles are in several of the illustrations. One page of the text also has a couple of riddles. Do something with riddle answers to assemble the word. It is a real word, not one we have made up. Remember it is not ‘Excalibur.’ (That was King Arthur’s sword.) If you have worked out the name you have won the sword and we will send or deliver it to you. Send us the name **plus** a short explanation of how you used the book to discover it.
